Senior Frontend Engineer | Design Engineer

Senior Frontend Engineer with 10 years building product interfaces with JavaScript, TypeScript, ReactJS/NextJS, VueJS/NuxtJS, and CSS. I work at the seam between design and engineering, shipping accessible, token driven UI on systems like IBM Carbon and owning features end to end from Figma to launch.

- Contributed to the revamp of **IBM's YourLearning** app, modernizing the architecture and rebuilding the UI on the Carbon Design System.
- Led the revamp of the **Baims** website, building a shared component library and achieving a 70% performance increase over the previous version.
- Optimized **CyberTalents** app performance to handle over 800k submissions, utilizing Turbolinks, refactoring the style structure, and enhancing Webpack with Laravel Mix.
- Built a customizable business card generator at **Reach**, a live visual editor that let 500+ users create personalized designs instantly.
- Mentored students and recent graduates globally in computer science fundamentals, JavaScript, React, and Vue through my course **JavaScript First Steps**, as a React Session Lead at **Udacity** and mentor at **MentorsWithoutBorders**.

WORK EXPERIENCE

Senior Frontend Software Engineer • IBM, USA (Remote, Contract via Avenega)

June 2023 - Present

- Worked on rebuilding YourLearning's UI with IBM's Carbon Design System, replacing bespoke components with Carbon primitives and design tokens for one consistent visual language.
- Built product specific components on top of Carbon, following IBM's accessibility standards for keyboard navigation, ARIA semantics, and color contrast.
- Improved scalability and UX by collaborating across teams to migrate an app to React, reducing load times by 30%.
- Reduced network calls by 20% by implementing an API optimization that cancels pending requests during page transitions, minimizing resource usage across departments.
- Partnered with product and design to scope features, turn Figma explorations into production code, and iterate on what usage showed.

Senior Frontend Software Engineer • KPMG, Germany (Remote, Contract via Toptal)

March 2022 - June 2023

- Designed and built the interface and charting layer for a tax and service calculation platform, making interactive data legible across 5+ departments while slashing retrieval times.
- Shipped an embeddable chart plugin adopted by 50+ employees monthly, turning a single team tool into a cross department product.

Frontend Team Lead • Baims, Kuwait

July 2020 - March 2022

- Led a team of 4 developers in a full platform revamp with Turborepo, Next.js, and TypeScript, reducing page load times by 70% and enabling faster service deployment through Vercel.
- Built the shared component library and styling conventions across the monorepo, keeping the new app, marketing pages, and legacy surfaces visually consistent as the team scaled.
- Owned the migration with product, QA, and backend: a seamless navigation system between new and legacy apps supporting a 3-phase launch with zero downtime, plus a caching based redirect system that improved user retention.

Senior Frontend Software Engineer • Reach.link, Kuwait

April 2019 - July 2020

- Designed and launched a customizable business card generator, a live visual editor with typography, color, and layout controls that let 500+ users create unique designs instantly.
- Launched a fully optimized Reach app with SEO, awards, and ads systems using ReactJS and Next.js, increasing organic traffic by 25%.

Frontend Software Engineer • CyberTalents

July 2017 - April 2019

- Revamped the UI on a restructured SCSS and TailwindCSS foundation of reusable utilities and shared patterns, improving page load speed by 35%.
- Optimized page caching with Turbolinks for faster navigation, reducing initial and blocking time by 40%, and restructured JavaScript into modular components managed with Webpack Mix.

Frontend Developer • BrandWorx, Egypt

June 2016 - July 2017

- Converted PSDs to pixel perfect HTML with animations for sites like Honda Egypt, Changan, and Nahda University.

PROFESSIONAL CONTRIBUTIONS

React Session Lead • Udacity

Dec 2021 - July 2023

- Addressed student questions during Connect sessions and managed weekly sessions to support student learning.

Frontend Software Engineer • Tarteel.ai, USA

Winter 2019

- Designed the interface for an innovative voice recognition tool that transcribed Quranic verses from diverse dialects.

Frontend Software Engineer • TeamKnot, USA

Winter 2020

- Developed sports management software for academies to manage players using Vue.js and Nuxt.js.

EDUCATION

Bachelor of Computer Science • Cairo Higher Institute, Egypt

Oct 2013 - May 2017

- Trained at Microsoft Egypt and was selected as a Microsoft Student Program representative at my university.
- Guided students in frontend development as a Frontend Instructor for the Wonderbox student program.
